

FAS-TAB

A Revolution in Sanitation and Disinfection Portability.

FOREWORD

Thank you for joining us in a new dawn of surface cleaning. Prepare to be amazed at the power of our tablets. **FAS-TAB XL** and **FAS-TAB XH** use Sodium Chlorite and other ingredients to generate Chlorine Dioxide, a gaseous molecule with dazzling properties, which will be suspended in the water with which you mix it. For now, we can only briefly describe some of these benefits, as we are not yet allowed to state disinfection claims. Let's just say that study after study has demonstrated that you have made the right choice in selecting **FAS-TAB XL** and **FAS-TAB XH** as your surface cleaning product!

OVERVIEW

When dissolved in water, these tablets create solutions that:

- Are highly effective in breaking down proteins and polysaccharides.
- Greatly enhance the performance of microfiber and other **Fas-Trak Industries** products.
- Aid in mold and mildew removal.

MIXING INSTRUCTIONS FOR USE

WITH ULTRA-TRAK PLUS:

Create a 150 ppm solution by filling the **ULTRA-TRAK PLUS** bucket with 4 gallons (15 Liters) of water and adding one **FAS-TAB XH** tablet. Always add the tablet to the water, never the water to the tablet.

Additional directions:

1. Once the tablet is dissolved, keep the bucket well covered at all times.
2. Attach wand and hose securely before pressurizing unit.
3. Prime unit in sink ahead of use in field.
4. Apply only enough product to remain wet for 5 minutes.
5. Wear goggles in case of accidents or spray-back.
6. Dispose of unused portion at the end of the day.

WITH FLUID 3D MOPPING SYSTEM:

Create a 170 ppm mopping solution by filling the whole 20 oz (600 ml) cartridge with water and adding one **FAS-TAB XL** tablet. Always add the tablet to the water, never the water to the tablet.

WITH TRIGGER SPRAY:

Create a 100 ppm solution for cleaning surfaces by hand with a microfiber wipe by filling a trigger spray bottle with 1 quart (1 L) of water and adding one **FAS-TAB XL** tablet. Always add the tablet to the water, never the water to the tablet.

USE

Chlorine Dioxide solutions, while containing no detergency ingredients, are still excellent at penetrating and breaking down the "scum" that can build up on contaminated surfaces. Chlorine dioxide has also been widely recommended by the EPA as a chemistry for the removal of mold, mildew, lichen and other fungi.

Fas Tab, in combination with **ULTRA-TRAK PLUS**, will execute exceptionally fast decontamination cleaning of:

1. Floors
2. Gym Mats
3. Student and Office Desks
4. Commercial Kitchens and Food Contact Surfaces
5. Break Rooms
6. Stretchers in nurse's offices
7. All hard surfaces

STORAGE

Store in a cool, dry place, away from direct sunlight. Keep in an airtight container. Avoid contact with:

- Heat, sparks, open flames and electric discharges.
- Water and water vapor prior to its use.
- Metals, metal salts, alkaline materials, reducing agents and combustible materials.

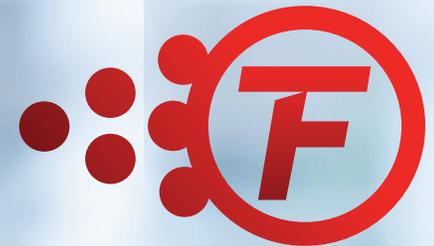

The tablet should not be handled with unprotected skin and must be added to the water, NOT the water to the tablet.

PRECAUTIONS

DANGER: READ ALL DIRECTIONS AND SAFETY INFORMATION PRIOR TO USE.

Keep out of the reach of children; do not inhale gas or vapors; do not ingest tablets or solution.

1. Do not occupy vehicle or room while gas release for deodorization is in progress.
2. Once deodorization treatment is complete,
 - Allow product to gas off for an additional 2 hours or more prior to disposal, and
 - Dispose of contents/container complying with local/state/federal regulations.

This product is an oxidizer that may intensify fire. Contact with water releases gas that may be flammable. Avoid contact with water until use.

- Keep away from heat, sparks and open flames. Store away from clothing and combustible items.
- In case of fire use water, sand or extinguisher.

Harmful if in contact with skin or eyes: may cause irritation, burns and contact dermatitis.

- After handling the product, do not touch skin or eyes. Wash hands thoroughly.

Harmful if inhaled: may cause difficulty breathing, cough, throat soreness, airway burns, edema and bronchitis.

- Use in well ventilated areas. Do not inhale dust from tablet, nor gas, fumes, mists or vapors from the liquid.

Harmful/toxic if ingested: may cause mouth, throat and stomach irritation, pain, nausea, vomit and diarrhea.

- Do not smoke nor consume beverages or food while using this product. Excessive concentration may be toxic to aquatic life.

Care in use:

- Exercise care when using this product: avoid inhaling the dust from the tablets and the gas that emanates from the solution; protect your eyes and hands while manipulating the product.

EMERGENCY AND FIRST AID PROCEDURES

If you were exposed and feel unwell or concerned, call poison center or seek medical advice immediately.

- **IF ON SKIN:** Remove all contaminated clothing immediately and wash before re-use. Rinse skin with water. If skin irritation occurs, seek medical attention.
- **IF SWALLOWED:** Rinse mouth and drink copious amounts of water. Call poison control center if you feel unwell.
- **IF INHALED:** Move person away from treatment area immediately.
- **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present.

FAS-TAB SIZES & USES AT A GLANCE

For use as a cleaner: spray, let sit for 15 to 30 seconds, and wipe twice with a clean microfiber cloth.

For use as any of the above applications: add to 4 - 6 gallons of water.
