

Pebble+

Removes 99.9% of bacteria and viruses

The Pebble+ incorporates our most Advanced Hygienic Protocol removing 99.9% of bacteria and viruses.

TUV accredited, the Pebble+ Plug & Play benefits from our Advanced Hygienic Protocol, incorporating intelligent H13 media filtration, UV-C light disinfection, and ION particle generation.

UV-C sterilization is initiated when the Pebble+ is not active. The Pebble+ will automatically start to sterilize the air inside of the hand dryer as well as cleaning the local air externally to the hand dryer. Any bacteria and viruses within the H13 filter are also disinfected. In addition, negative IONS are produced to clear particulates from the surrounding air, allowing better air quality within the local environment. This protocol allows for 24/7 protection.

Dryer VS paper costs

Cost of annual energy usage: \$26.00 against a paper towel cost of \$450.00. A saving of \$424 = 94%*

Recommended usage: Medium and High
